

# MPC INNOVATION PANEL

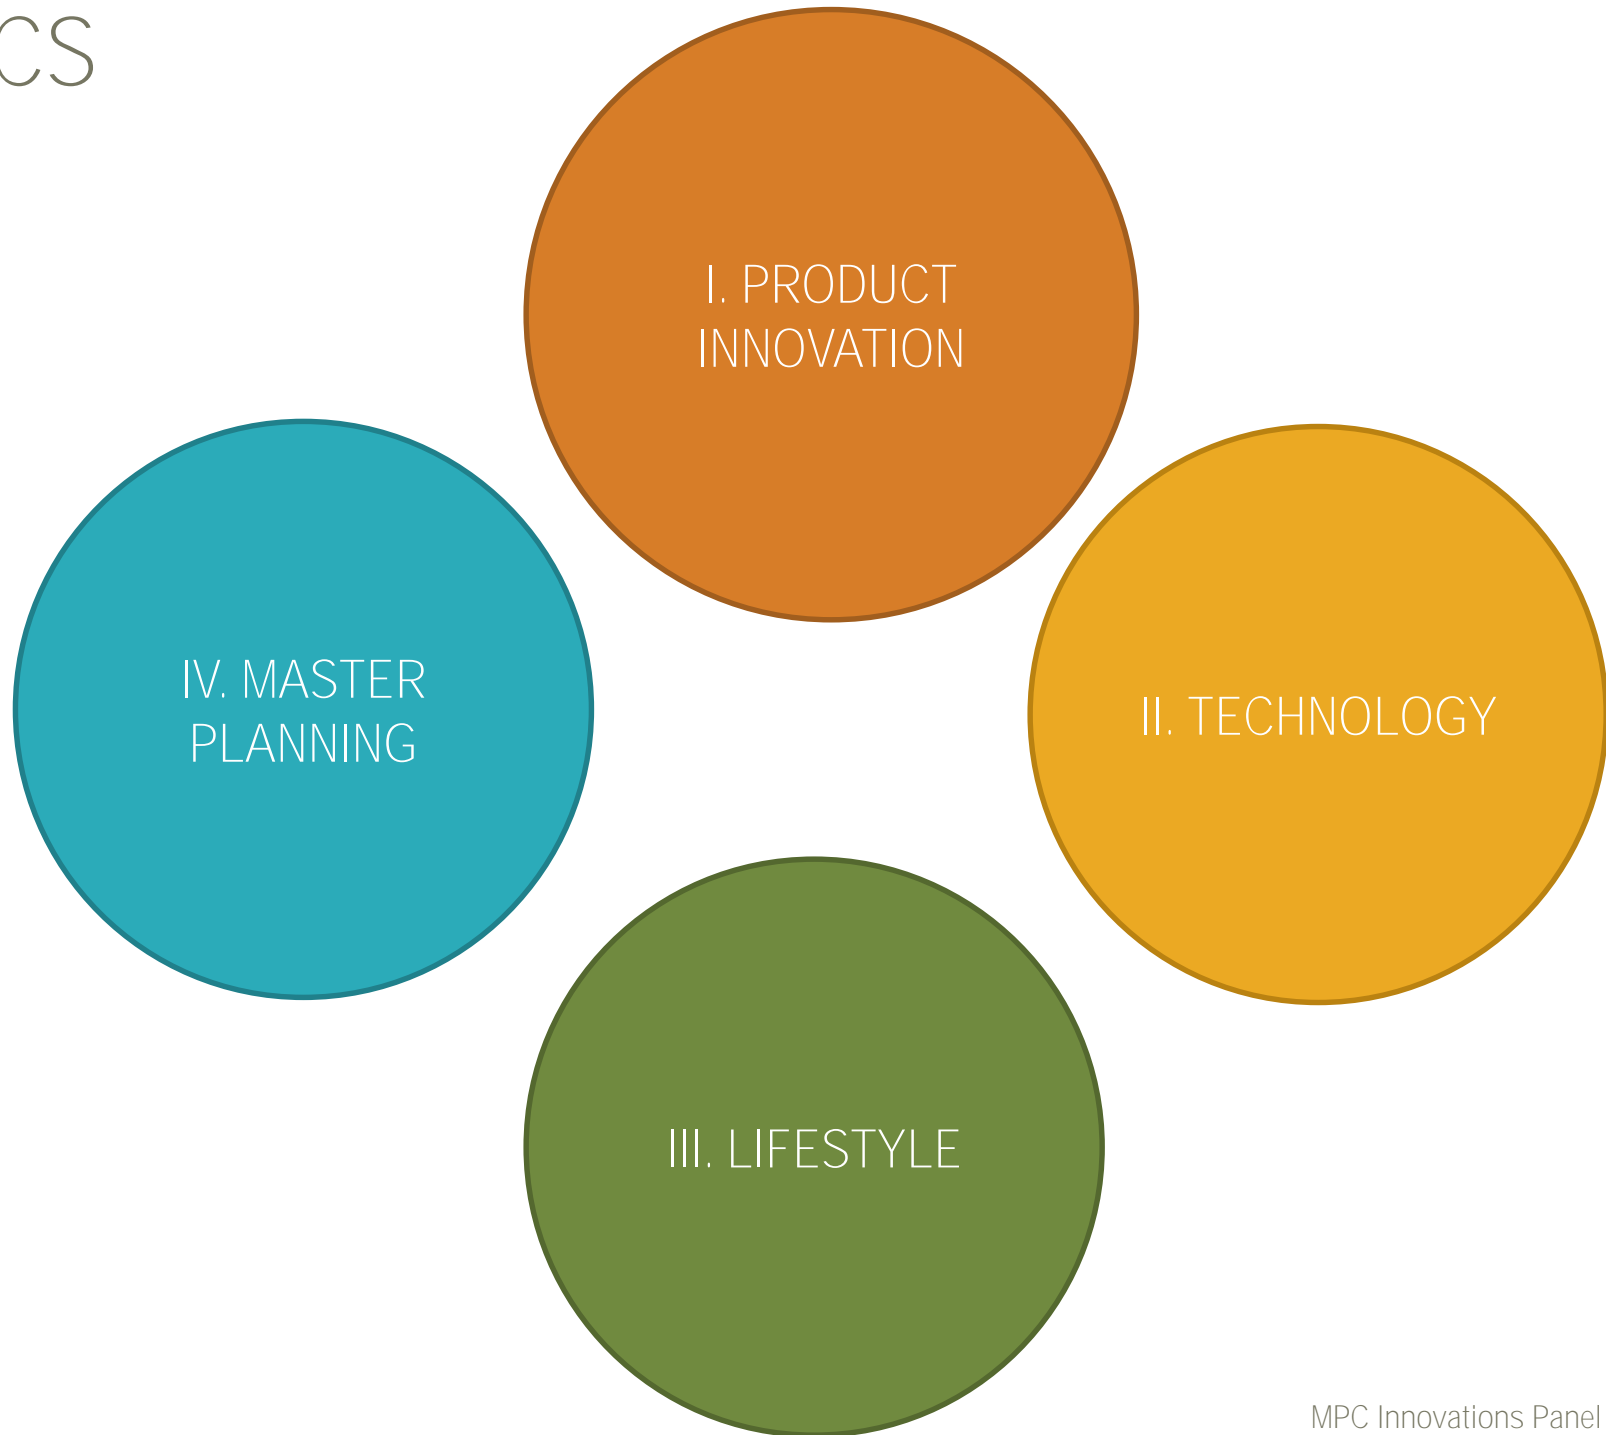

ULI Fall Meeting

***Moderated by Gadi Kaufmann***

***Panelists: Beth Callender, Laura Cole,  
Kathy Cecilian, & Tom Woliver***

**RCLCO**  
REAL ESTATE ADVISORS

# DISCUSSION TOPICS

An aerial view of a city skyline, likely Los Angeles, with a teal overlay. The image features several prominent skyscrapers, including One Wilshire and City National Bank. A large, semi-transparent teal 'X' shape is overlaid on the left side of the image. The text 'I. PRODUCT INNOVATION' is centered in the middle of the image.

# I. PRODUCT INNOVATION

## Attainability is the “target”

Start with innovative site design

SUBMITTED BY LAURA COLE

# ACTIVE ADULT MEETS CLUSTER COURTYARDS

## Notable:

- Better Streetscene
- Instant Neighborhood
- Increased Density

# BLU HOMES: LUXURY PREFAB HOMES

Often selling at 25%+ above the cost to build

SUBMITTED BY GADI KAUFMANN

# Build To Rent: A New Way of Thinking

SUBMITTED BY MATT BLANK;  
PRESENTED BY TOM WOLIVER

# NEXMETRO: BUILD TO RENT

SUBMITTED BY KEN ABRAHAMS;  
PRESENTED BY GADI KAUFMANN

# BUILD TO RENT TOWNHOMES

## Linear Townhouse Product

Density: ~22 per Acre

Garages: Direct 2 tandem for 90%

Net Rentable SF/Ac: ~28,000 SF

**THE LINEAR TOWNHOMES**

We are trying a new series of 22 to an acre row townhouses to compete with more traditional 3-story institutional stacked, flat product that might get 26 – 27 per acre. We hope the cost will be comparable, but that the consumer preference will be much stronger for townhome living.

SUBMITTED BY RANDALL LEWIS;  
PRESENTED BY GADI KAUFMANN

# GEORGE CASEY

## The advent of new single family for rent as a product type

This broadens out demand in MPCs and brings in potential homeowners into the community, accelerating lot absorptions, too. The maturation of both ownership types for the SFR and financing alternatives for them to me means that this is a sustainable product type that is in demand and really helps a MPC.

## Accelerating advancement of off-site factory built and modular housing solutions

More of the **“building”** is done off-site and brought into the site.

It also redefines the role of what we now consider to be the builder and, in my mind, opens wider the option for the developer to actually become the builder, also, more easily. It is obvious that the current system creates builder-developer friction and inefficiency.

The waste in the current method of building homes sooner or later diminishes residual land value. The slowness of the current system is highly inefficient from a capital turn standpoint. Finally, the ability of the developer to better control the buyer experience and to use speed of delivery as a competitive weapon cannot be overlooked. Bottom line, there is an opening for a newer business model and it could be huge.

Monetization of data. **I don't know how it will occur in its final form, but how** developers develop, use, analyze data about the use of homes and facilities in a community will have value and this cannot be ignored.

## II. TECHNOLOGY

KNOW YOUR DATA, KNOW YOUR CUSTOMERS,  
KNOW YOUR FUTURE.  
**LUMINATE.**

A person is sitting on a rocky cliff, looking out over a vast sea of clouds. The scene is captured at sunset or sunrise, with a warm glow on the horizon. The person is in silhouette, wearing a dark jacket and shorts. The clouds are dense and white, filling the lower two-thirds of the frame. The sky is a mix of blue and orange. In the bottom left corner, there is a logo for RCLCO.

RCLCO

# ADRIAN FOLEY

Technology is just starting to appear, we are looking at everything from **APPS** for the community to "usage" tracking to better understand how our residents are using the parks, pools etc.

# UBER ELEVATE

## What is Uber Elevate?

- ▶ On-demand urban air transportation
- ▶ Push a button, get a flight
- ▶ A Network of small, electric aircraft that take off and land vertically called E-VTOL

## Initial Vertiports

- ▶ Frisco Station
- ▶ DFW International Airport

FRISCO STATION

# ROBOTS SERVING THE HOSPITALITY INDUSTRY

- ▶ Robots serving the hospitality industry made by a company called Savioke.
- ▶ Their products are being used by companies such as Marriott, FedEx, Millennium Hotels and Resorts, and Starwood. Each company refers to their robots with a customized name (Marriott has “Wally”)

## No Tip Required

Relay delivers everything from food and beverages to linens and toothpaste directly to the guest room. More than convenience, Relay delivers the highest level of reliability and security.

## An Experience Worth Sharing

Studies confirm, TripAdvisor scores and social media reviews directly effect hotel occupancy and RevPAR. That's where Relay can help. A social media magnet, Relay inspires guests to share positive posts and reviews about your property.

## Happy Staff = Happy Guests

Over 80% of hotel staff say Relay makes them more effective and more satisfied with their job. By taking over the time consuming task of guest room deliveries, Relay lets your team focus on the job of creating a positive guest experience.

# ROBOTS SERVING THE HOSPITALITY INDUSTRY

# RETHINK THE CAR

Improved transportation, ride-share, electric bikes, and the advent of driverless cars – **how much real estate should the car “own” in our new communities?**

- ▶ Protected bike lanes
- ▶ Bike parking
- ▶ Bike Share within the community
- ▶ Off-street trails and pathways
- ▶ Variety of trail types/surfaces
- ▶ Trails that go somewhere!

# THE NEW SECURITY GUARD

This is a security robot that patrols a very upscale shopping district in Houston, TX!

- ▶ An example of bots coming into our worlds and replacing human talent

SUBMITTED BY RENEE LEWIS

# TECHNOLOGY IN USE BY THE COMMUNITY

## Instagram Takeover – Great Park Neighborhoods

- ▶ GPN team invited a resident to take over their Instagram account for a day in an effort to generate [authentic story-telling](#) from their residents POV
- ▶ Engagement increased by [50%](#) during the takeover

# THE PINEHILLS: MAKING MIXED-USE WORK

To achieve ROI without subsidies, it has to grow organically

► 2/3 – 1/3 Rule

SUBMITTED BY TONY GREEN;  
PRESENTED BY BETH CALLENDER

# THE CAMP-OUT: RANCHO MISSION VIEJO

## CELEBRATE THE GREAT OUTDOORS

- ▶ 9 tent structures sleep 2-4 people each
- ▶ Residents enjoy coordinated activities
  - » campouts
  - » day camps
  - » individual reservations
- ▶ Promotes unstructured play.

SUBMITTED BY AMAYA GENARO;  
PRESENTED BY BETH CALLENDER

# MY LIFESTYLE, MY CLUBHOUSE

## Notable:

- The Clubhouse is the neighborhood meeting place
- Coffee and Wine Bar
- Presentation Kitchen
- New Social Spaces
- Knockout Fitness Center

# BREATHING ARTS AND CULTURE INTO MPCs

# ACCESS OVER OWNERSHIP

When you can pay to use cars by the minute, and access office space by the hour, then **'traditional'** ownership looks wasteful.

## FINALLY, LESS STUFF!

- ▶ Storage – what do I need to store vs. what I can borrow?
- ▶ Kitchen – how do pre-portioned meals and Amazon Home Delivery impact design?
- ▶ Connectivity – with streaming service, access on demand, WIFI is as important as electricity.

# SPORTS AS AN ANCHOR

## Constellation Field, Home to the 2016 Atlantic League Champion Sugar Land Skeeters

- ▶ Stadium jump-started and now anchors the Imperial redevelopment project

SUBMITTED BY DOUG GOFF;  
PRESENTED BY BETH CALLENDER

# SPORTS AS AN ANCHOR

## How It Worked

- ▶ Citizen-Led Visioning Task Force Recommended Minor League Baseball Stadium; a partnership between the City, land developer and the team
- ▶ Developer donated 22 acres and received \$1M COSL advance for the infrastructure
- ▶ City contributed \$36M and received TIRZ reimbursement for surrounding development
- ▶ Team provided \$6M in capital and leased the facility for 25 years.
- ▶ 7,500 seat capacities, more than 500K attendees in 2016; regional economic benefit at \$7.7 annually

SUBMITTED BY DOUG GOFF;  
PRESENTED BY BETH CALLENDER

# WORDS OF WISDOM FROM THE FIELD

- ▶ Gone are the country club-style amenity centers that are closed-off, cold in design, and give a sense of exclusion vs. inclusion.
- ▶ Driven by technology – consumers are living more flexible lives; employers are adapting workplaces; and physical retail space has become more experiential.
- ▶ MPC and Mixed-Use projects should consider integrating these dynamics into their amenity offerings and programming to strengthen neighborhood connectivity.
- ▶ Reflect the consumers need and desire for gathering places, entertainment and open space into the overall community.
- ▶ A cohesive approach to **developing “place” and soft programming** can build a strong brand that leads to above-market performance.
